

What Headsets are compatible with the Xblue IP9g Desk phone? On the back of the IP9g there is a USB port for a Wifi or a Bluetooth dongle. You can have a Wifi dongle or a Bluetooth dongle but not both. The Wifi dongle enables the phone to operate on your XBLUE cloud or on-site phone system without the need for a data cable connection. The Bluetooth dongle enables the use of wireless Bluetooth headsets. Below are brands and models of Bluetooth Headsets validated to be compatible with the IP9g desk phone. There may be others that are compatible but Xblue has not validated them as compatible headsets.

Bluetooth Headsets		Bluetooth Headsets		USB Wired Headsets	
Brand	Model	Brand	Model	Brand	Model
Jabra	Evolve 75	Plantronics	Voyager 5200	Jabra	BIZ 2400
Jabra	Stealth	Plantronics	Discovery 975	Sennheiser	SCx5
Sennheiser	MB Pro	Sennheiser	Presence		

Note: The IP9g supports general standard USB. Other headsets that support standard USB may be compatible with the IP9g. The list above is all that Xblue has tested currently.

USB Wireless Headsets & Electronic Hook Switch (EHS) Adapter

The EHS Adapter is needed to achieve remote control and allow users to answer and end calls by pressing the multi-function button on the headset.

Brand	Model	EHS Cable
Plantronics	Savi 700/cs50/Voyager Legend	APD-80 EHS Cable
Jabra	Jabra Pro 920/925	Fanvil EHS20
Sennheiser	SDW 5015 DECT	CEHS-AV 04

Xblue Wireless Headset, Electronic Hook Switch (EHS) Adapter and Wired Headset

These headsets use the RJ9 Headset Jack on the back of the phone. They can be purchased directly from Xblue at <https://xblue.com/product-category/accessories/headsets/>. The EHS Adapter is needed for the wireless headset to achieve remote control and allow users to answer and end calls by pressing the multi-function button on the headset and can be purchased as a kit with the EHS Adapter. These headsets and headset kit are also compatible with the Xblue IP7g.
